## **IXL**

We are asking students to do math and English IXL work over the summer. IXL is an adaptive learning platform that allows us to identify students strengths and holes and allows each student to work on their areas of weaknesses.

All students entering into Grade 5 and 6 will enter the IXL arena and complete the diagnostic for English and Math. Then all students need to complete the necessary lessons and to earn an IXL score of at least a 500 for 5th or a 600 for 6th grade.

Students entering 5th grade are expected to have an arena score of at least a 500 in both math and English by the time school starts. Students entering 6th grade are expected to have an arena score of at least a 600 in both math and English by the time school starts.

This work will take each student a different amount of time depending on strengths and weaknesses. Once a student has obtained the needed scores, they are welcome to continue working on new skills.

### **Please see the attached form for instructions on how to use IXL.**

If your student needs a user name and password, that information is coming in a separate email. Current FCA student should continue using their same account.

Contact Stephanie Radbill for user name and password.
